

Employee Engagement

1. CREATE THE VISION

What's the value proposition for your employees, your company, and your customers? We facilitate this conversation with your leadership

2. DETERMINE METRICS OF SUCCESS

We help create the business performance goals to improve employee engagement and boost customer loyalty.

6. ACTION PLAN

The most valuable insights will be the recommended action plan to improve engagement, performance and the bottom line.

5. EXECUTIVE SUMMARY

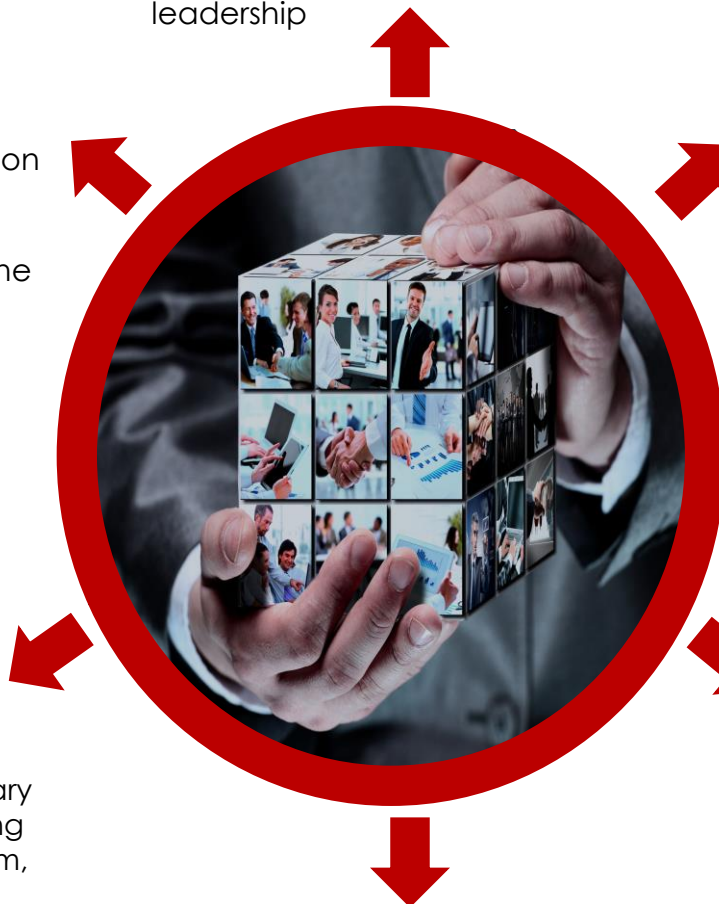

Our EE Consultants provide leaders with an executive summary of the results including reports for each team, insights to culture alignment, barriers to success, and verbatim feedback.

4. EXECUTE SURVEY

The next step is to facilitate information sessions for employees and managers to communicate WHY the survey is important.

3. ALIGN EXPECTATIONS

We customize the survey design to include the questions that will uncover issues aligned to values, purpose and business metrics
